

No	Heuristic	Description of the Issue	Screenshot	Severity	Suggested Improvement
1	H1-1: Simple & natural dialog	Lectures and courses table contains "ID" column		2	Remove column entirely as it does not hold any functional value for user
2	H1-2: Speak the users' language	Edit and Delete are icon-only with no tooltip on hover		1	Add hover tooltip text for delete and edit buttons
3	H1-3: Minimize users' memory load	Join codes are shown only on the lecture dashboard at the moment of starting. When the teacher closes the tab, there's no view that shows the live code; they must reopen the lecture dashboard. On the lectures dashboard there is a list with codes, but for past lectures too		2	Hide join codes for ended lectures from the lecture dashboard. Add the live code to the top of the teacher dashboard.
4	H1-4: Consistency	confirmation pattern mixes native		2	Replace window.confirm() with MUI Dialogs

		window.confirm() and MUI Dialogs across destructive actions			
5	H1-5: Feedback	When teacher creates new course there is now confirmation message		2	Add a confirmation message indicated that course was added
6	H1-6: Clearly marked exits	When viewing lecture dashboard, the only way to return back is to click menu button / back browser button		2	Add “back” button
7	H1-7: Shortcuts	To start a lecture teacher must first navigate to the courses table, find the correct course and click the button		2	Add “create lecture” button to the teacher Dashboard
8	H1-8: Precise & constructive error messages	The error message is unclear when there is no connection to the server; user can't understand the problem		2	Add descriptive error messages
9	H1-9: Prevent errors	The student attendance dialog submits the join code immediately with no preview of which		2	Add a confirmation message displaying the course name, teacher's name, date

		lecture/course is being marked			
10	H1-10: Help and documentation	Teacher dashboard is empty; there is no guidance on how to start using the application		3	Implement “first sign on” tour / add pop-up descriptions
